

NORLYS is a Scandinavian company with a 50 years history in the professional lighting business. We offer one of the largest product ranges in decorative outdoor lighting and we deliver highest quality all over the world.

No secret: our quality comes from the choice of excellent raw-material in combination with a perfectly controlled production process. All our products are made in Europe in our own ISO 9001 certified factory. On a surface of more than 15000m² we use most modern machines and equipment. Steady investment keeps us on the top of the industrial process. A good example is our foundry, one of the most modern installations in Europe.

When we cannot do it alone, we carefully choose our partners. This is especially important in the field of LED technology. We use the best LED quality from the very best suppliers. No compromise allowed!

Good design, large choice, excellent quality: indeed that's what our customers appreciate! In this world of quick exchange it is equally important to work on high delivery-speed. This is why we have several very large warehouses with thousands of finished products ready to be shipped. If something is not already in stock, we produce within days.

No pictures contained in this catalogue can be reproduced, even partially. The Company reserves the right to change technical and aesthetical characteristics of illustrated products at any times, in order to increase constantly their quality and performance without written notice.

NORLYS offers a large variety of lamp options. Please refer to the concerned product page for details. The large majority of our products is delivered without lamp.

Many fixtures are equipped with E27 lampholder. Please see below for equivalents between GLS and halogen lamps to be used. For example if a 60W incandescent lamp is recommended, you can use halogen lamps up to 46W. Alternatively you might use fluo compact lamps with integrated ballast or LED retrofit lamps for E27 lampholder. Do not hesitate to contact us for advice.

HALOGEN		GLS
30W	<=>	40W
46W	<=>	60W
57W	<=>	75W
77W	<=>	100W

In some exceptional cases our products are delivered with LED bulb(s). Originally this has been done to make sure that the right lamp is being used in the concerned fixture. In other cases it simply makes installation easier (see RENA inground fixtures).

Finally, you will as well find a large number of products with LED module. LED modules allow better cooling and optimized control of the light output. Certain fixtures use more than one module and in the case of VISBY for example, each module can be driven separately. As a result you have a fixture allowing many different applications (twilight detector, movement detector, different light output in function to your needs). LED modules are a good solution to save energy and to decrease maintenance cost over the time.

Design and technical details:

The characteristics of the models mentioned in this catalogue are not binding. Norlys reserves itself the right to change them without notice and without obligation of communication in according to its own technical constructive requirements and/or to improve the products.

SCANDINAVIAN WOOD

Our new range of wooden bollards fits perfectly to all projects combining modern lighting in harmony with natural materials.

We use a selection of first class Scandinavian pine wood, impregnated for protection.

Easy maintenance: painted twice during production, refresh the surface with oil paint.

Special marked with *:

Impregnated only: without painting on request to allow customized colours.
